Mobile & full-stack product engineer. I build Flutter apps and the backends, dashboards and infrastructure behind them. 3+ years of experience (since Sep 2023). Also known as Aziz Khan.

EXPERIENCE

Flutter Developer, TriTech Solutions — Sep 2025 — Present

- I build production mobile apps from concept to deployment, working with designers and backend developers.
- I own projects end to end: Flutter clients, Bun/Express APIs, React and Next.js admin panels, Cloud Functions, payments and store deployment.

Freelance Flutter Developer, Freelance — Dec 2023 — Present

- I deliver cross-platform apps for clients with Flutter, Firebase and REST APIs, including real-time chat, secure authentication and push notifications.
- I handle the full engagement: scoping, responsive UI, backend integration, store release and handover of a clean, documented codebase.
- Freelance work includes Together (a full-stack social app), a desktop sales and invoicing app for a retail franchise, and Tourism Pakistan.

Flutter Engineer, Autop Pty Ltd — Jan 2025 — Feb 2025

- Led development of Trade X, a cryptocurrency signals platform, building production Flutter apps from scratch.
- Moved state handling to BLoC with a clean, feature-based architecture. Separating business logic from the UI made bugs easier to trace and cut regressions between releases.
- Set up modular code that other developers could extend without touching unrelated features.

Flutter Intern, Extendztech LLC — Sep 2023 — Dec 2023

- Supported UI development using core Flutter widgets and layout techniques.
- Responsive design across screen sizes, and performance tuning.

SELECTED WORK

- **Safar** (TriTech Solutions): A ride-hailing app for Peshawar, with rider and driver experiences in one Flutter codebase. *Flutter, Bun, Express, PostgreSQL, WebRTC, React.* azizapps.com/work/safar
- **SMS Gateway** (TriTech Solutions): Self-hosted SMS infrastructure that sends OTPs and transactional messages from a real SIM card. *Flutter, Kotlin, Bun, Express, PostgreSQL, Next.js.* azizapps.com/work/sms-gateway
- **Faida** (own product): A real-time deals app for local shops in Peshawar, on Google Play. faida.azizapps.com
- **Live on the stores:** Safar, Maintenance App, ChiroSimple, Tax Corp. All apps: azizapps.com/work

SKILLS

- **Mobile:** Flutter, Dart, BLoC, Provider, GetX, animations, offline-first data
- **Backend:** Bun, Express, PostgreSQL, Supabase, Firebase, Cloud Functions, REST APIs
- **Web:** Next.js and React admin panels and dashboards
- **Integrations:** Stripe, Google Play billing, WebRTC, Google Maps, push notifications, real-time chat
- **Delivery:** App Store and Play Store releases, QA (manual and automated), CI/CD

EDUCATION

Software Engineering, City University of Science and IT (CUSIT), Peshawar · 2025
